DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim is rejected under 35 U.S.C. 102(e) as being anticipated by Milliron et al. (US 6,208,670).

As shown in figures 5-8, Milliron et al. discloses a system for providing multiple time-division multiplexed (TDM) channels over a shared X-DSL communication medium and the system (column 11, lines 27-39) comprising:

a subscriber line (35);

a first modem (figure 6A) with an input and an output and the first and a second modem (figure 6B) communicating with one another across the shared communication medium with at least the first modem accepting a plurality of TDM channels (figure 8) at an input thereof ;

a payload framer (44) coupled with the first modem for accepting the plurality of TDM channels as an input and for placing data associated with each of the channels in a payload portion of the X-DSL frame; and

a payload deframer (85) coupled with the second modem to demultiplex the payload data.
